

INSTRUCTION FOR APPLICATION

Botanic

Substrate and preparatory work

The walls must be dry and smooth, firm and free of dust and grease. Remove old wallpaper, water soluble and loose paint layers and also ballpoint and crayon marks. Oil based paint should be sandpapered and cleaned with ammonia. Pre-paste absorbent walls.

Control of delivery

Do all rolls have the same production number ? Use the wall covering in the sequence of production number.

Never use wall coverings from different production runs on one wall. Cut and apply only 3 lengths, if the results are to your satisfaction, continue.

Attention: Defects in the material can be noticed after hanging 3 lengths. Should this happen we advise you to notify your supplier immediately. We cannot accept any claims after more than three lengths have been applied.

Preparation

The wall height plus 4 cm (2") is your length. Mark the back of each length with a sequence number using a black graphite pencil. Make a plumb line from the corner for the first length.

Adhesive

Henkel Perfax textile adhesive or equivalent.

Hanging

Apply the textile adhesive to the wall using a lambskin roller. For every drop paste a section of the wall approximately 10 cm (4") wider than material. In that way you do not need to touch the earlier length with your lambskin roller.

Hang the first length against the perpendicular. Press home using a **soft brush (don't use a spatula)** and work from the middle upwards and downwards to eliminate all air.

Avoid scratching or rubbing the 3D printed surface. Cut off selvedge at ceiling and skirting using a spatula and Stanley knife. The next lengths can be butt jointed or overlapped and cut through, the latter method should give you perfect joints.

Bring the material round external corners and cut through internal corners, when these corners are not straight.

Repeat :

Design Seta: no repeat, lengths should not be inverted.

Design Ornata: 69 cm repeat, lengths should not be inverted.

Design Nere: no repeat, lengths should not be inverted.

Maintenance

Can be wiped or sponged clean.
